## OUR VISION

We strive through excellent design and innovation to lead the way in client satisfaction and professionalism.

Creating a sense of place is core to our designs, and part of our commitment to customer service. We have the planning expertise to deliver high-quality, contemporary housing that we are proud to be associated with.

Space and place, form and detail are the raw materials we use to create an elegant solution to your needs.

## OUR TEAM

**Glenn M. Travis**  
Principal

Glenn's long-time passion for residential design is clear in his work for GMT's clients. He has a great appreciation for the importance of even the smallest detail and relishes tackling design challenges for all home styles, from contemporary to New England's traditional architecture.

**Felipe Sanchez**  
Designer

Felipe is a Wentworth Institute of Technology graduate with a Bachelor of Science degree in Architecture. His passion for architecture comes from seeing the designs of Oscar Niemeyer in his hometown in Brazil. Felipe is a strong believer in sustainable and efficient architectural design.

**Janice Hunt**  
Architect

Janice has been a registered architect in Massachusetts for over 20 years, with experience designing and remodeling homes in the Boston area and Key West, Florida. Janice is also a licensed Interior Designer; she has designed interior office space for State Street Bank, Hancock Insurance, radio stations, and retailers.

**Evan Travis**  
Intern

Evan is currently a junior in high school seeking experience in the field of business and architecture. His goal is to gain real world experience that will be beneficial to his future. He is Glenn's eldest son and really enjoys being a part of his father's company. Evan is delighted to be on the GMT team and to be involved in producing quality design for GMT HD clients.

**Patricia Kendall**  
Architect, NCARB,  
LEED AP BD+C

Tricia is a Massachusetts registered architect and is LEED accredited with a Building Design and Construction specialty. She received her Master in Architecture from Harvard University and has taught in the architecture program at several universities. Tricia loves solving architectural puzzles from the initial design concept through the final steps of construction to provide spaces that more perfectly fit the lives of contemporary families.

**Carrie Travis**  
Project Coordinator

Carrie worked in the design/construction industry for 6 years after being a stay at home mom. With experience as an office manager and project liaison in previous firms, she brings valuable knowledge as Project Coordinator to GMT Home Designs. She has been married to Glenn for over 20 years and loves being able to work side by side with him, their son, and the team. Her passion for helping others and love of beautiful and thoughtful design makes her an asset to the company.

## ARCHITECTURAL SERVICES

From complete residential architectural design to the production of construction documents, we partner with you to bring your dreams to life.

- Additions
- Remodels
- Kitchen/Baths
- Custom Homes
- Sustainable Building
- Design Consultations

## RESIDENTIAL KITCHENS

Today, the kitchen is no longer just a room for making meals—it is truly an integral part of the living space. The separation between kitchen, dining area, and living area no longer exists.

Kitchen cabinets, appliances and countertops are central design elements that give you a great opportunity to define and elevate the appearance of the home as well as its function.

3D renderings and photo-realistic visualizations of a finished project are a core part of what we do at GMT Home Designs, giving our clients confidence in their decisions and the outcome before work even begins.

## RESIDENTIAL BATHROOMS

Not just a utilitarian space, today's bathroom can be a place of luxury and relaxation as well as convenience.

Smart design and reflective finishes bring better flow and more light to create a spacious, light-filled retreat.

Frameless glass shower enclosures make the room feel more spacious. Endless choices for materials and finishes as well as high-tech plumbing fixtures means you can have a space designed exactly the way you want it.

Our 3D rendering services allows you to see the space before it is built, so you can perfect every detail.

## WHOLE HOUSE REMODELS

There are many reasons you might choose to remodel an entire home. Perhaps you've bought a home that you love, but the interior design just isn't your style. Maybe you're an empty-nester and are ready for a lifestyle change or aging-in-place improvements. Or you've inherited a property that is ready for restoration or improvement.

Remodeling a whole home can be daunting but deliver huge pay-offs. The end result can be a cohesive design, significantly improved property value, and flow and function that are optimized to your lifestyle and tastes.

*The following pages (14-21) highlight a whole house remodel we completed in 2014.*

Sometimes it makes more sense to have two islands in a kitchen, especially in an expansive space.

With a smart layout and configuration, two islands can improve a kitchen's traffic flow and function.

Traditional, transitional, modern, contemporary — the lines have been blurred in favor of a style that is individual and authentic to you. Each space is unique but the whole is cohesive.

Each space has its own purpose, emphasizing conversation, relaxation, or organization and utility.

## RESIDENTIAL EXTERIORS AND OUT-BUILDINGS

There are many variables that contribute to the curb appeal of your home: the roofline, the pitch of the roof, the entryway, the setting surrounding the home, the orientation of the home in the lot and towards the sun, and of course the style and look of the façade itself.

Custom design offers the opportunity to match the essential requirements with a design that is appealing and consistent with your taste. GMT Home Designs' innovative use of materials and attention to detail have resulted in award-winning projects that homeowners love.

## RESIDENTIAL OUTDOOR SPACES

Outdoor living has evolved with the housing market, and it's better than ever. Many people have taken to remodeling to create backyard areas that are a true extension of the inside of the home.

Popular trends in outdoor living include fully-equipped kitchens for cooking ease, lighting to make the space livable in the evening hours, and fireplaces for added comfort.

## 3D RENDERING - SEEING IS BELIEVING

Your customized concepts are turned into realistic 3D renderings with our state-of-the-art design process.

First we plan. Then we design. And long before the construction begins, you are able to see the details of your designs like never before.

Furthermore, the program we use is complete with materials lists. Options are at your fingertips. Cost estimating is faster and more accurate. You save time and money.

Overall, this accelerates the design and construction phases, so you are celebrating and living in your completed project as soon as possible.
